

Fresh n' Clean

All Natural Super Concentrate Wash Aid

For Fruits, Vegetables, Meats, Poultry and Fish

How Fresh N' Clean™ Works... Fresh N' Clean's™ exclusive "Multi-Clean" system contains 10 all natural ingredients, FDA approved food use, that unlock the surface bond between the impurities and the surface of your fruits, vegetables, meat, poultry and fish. These impurities are encapsulated so they don't redeposit on the surface. They are broken down and washed away. Fresh N' Clean™ has been shown to remove between 95-100% of surface impurities and is at least 500 times more efficient than water alone.

Fruits And Vegetables... There are over 600 pesticides in use today, many of which are known carcinogens, neurotoxins, endocrine disruptors and reproductive toxins that can be legally used on your fruits and veggies. There may be as many as 25 different pesticides on an apple or tomato. These pesticides, when consumed, accumulate in the fatty tissues of the body and over time exert their harmful effects causing long term problems with cancer, nervous system impairment, infertility, memory loss, estrogen imbalance in women and poor immune system function. Pesticides are a risk factor in breast cancer. They cause monthly cycle disruptions, chemical sensitivities and problems involving estrogen balance. Only 19% of cancers are genetic and the rest are from environmental factors. Children are at risk for neurotoxic effects including neuroblastoma, Attention Deficit Disorder (ADD), hyperactivity, memory loss and inability to learn. They consume far more of these toxic chemicals than adults do in relation to their body weight. Remember, 50% of children under the age of 13 who die, die as a result of cancer with many more showing long term health problems. Washing your fruits and veggies with Fresh N' Clean™ will remove these contaminants making them healthier to eat. Five portions of fruits and veggies each day are recommended for a healthy diet. Fruits and veggies washed with Fresh N' Clean™ will taste better, last longer and be better for you.

Meat, Poultry And Fish... Meat, poultry and fish have surface contaminants such as oxidized oils, processing contaminants and in some cases feces from the slaughtering process. This contamination is carried through the whole handling process to the final packaging at your local store or meat market. These contaminants not only pose a health risk but also interfere with the flavors these products naturally have when they are contaminate free. While Fresh N' Clean™ can not be used on ground products such as hamburger or turkey, its use on whole pieces of meat, such as steaks, poultry, poultry parts and fish will remove these contaminants providing you with a healthful, natural product that tastes good and is good for you.

Clean all of your fruits, vegetables, meats (except ground meats and poultry), poultry and fish with Fresh N' Clean™ for a healthier meal free of pesticides, heavy metals, fertilizer residues, oxidized oils and processing contaminants. Fresh N' Clean™. Bon Appetite!

*Fresh N' Clean™ is not intended to kill or mitigate microorganisms on the surface of fruits, vegetables, meat, poultry or fish.
